Bachelor - Informatics

PROFILE

I'm Audrius, back-end and mobile developer since 2006. I can turn your idea into reality with a very reasonable budget. I was working in largest IT companies in Lithuania that works with USA, Canada, Netherlands and Lithuania banking, health care, insurance, field service, airline and government sectors. I also started a few start-ups myself. I work with most Java related frameworks, OAuth2 security, relational and No-SQL databases, messaging, both SwiftUI and UIKit on iOS and JetPack Compose or traditional activities framework on Android.
